Dr. Krishna Prasad Kudlu
President, Karnataka Ophthalmic Society

Let me take this opportunity to first thank you for choosing me to lead you through Karnataka Ophthalmic Society for the past year. The year has been one with many firsts. Firstly, I would want to congratulate ourselves for conducting the first international KOS conference, VISUCON at Dubai in the month of May'24. It was well attended by over 100 delegates and their families.

We brought out a new scheme of donating Rs.50,000 to district societies for the conduct of a district level conference. With these the intention was to encourage smaller societies in tier 2 &3 towns to conduct meetings, impart knowledge and build camaraderie. I made it a point to visit meetings personally at Uttara Kannada, Bellary, Tumkuru, Chitradurga, Hubli- Dharwad, Bangalore, Dakshina Kannada and Udupi. As a trustee in the Yashaswini Board, I have kept the best interests of ophthalmologists in mind and many are beneficiaries of it. Throughout my annual duties, I have been fully backed and supported by Hon. Secretary Dr. Chaitra Jayadev and the very dynamic Scientific Committee Chairman Dr. Vikram Jain and Editor- Journal Dr. Kavitha. We were very strongly backed by the whole governing council of KOS.

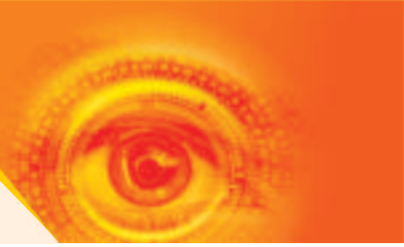

The highlight of this year's calendar is the annual KOSCON and we are hosting it at exceptional place Udupi and fantastic Venue UVA Meridian Convention Centre. The Udupi District Ophthalmic Society (UDOS) is conducting 43rd Annual Conference of Karnataka Ophthalmic Society under the Aegis of Karnataka Ophthalmic Society which is in collaboration with Manipal University and Ibeach Film Festival. In this endeavour of presenting to you a memorable experience, the theme of the conference being 'SCIENCE AND HERITAGE'. Our aim is to ensure that each delegate not only gains valuable insights into the advancements in ophthalmic science, but also experience the rich cultural

heritage of coastal Karnataka. I have been ably supported by Chief organising Chairman Dr. Yogesh Kamath, Chief Organising Secretary Dr. Shamanth Shetty & Chief Organising Secretary Dr. Shailaja Bhat and Treasurer Dr. Sharath Hegde and special mention to the whole organising team. The tireless dedication and hard work of the volunteers and the agencies have been pivotal in bringing this conference into fruition.

I wish the incoming president and his team the very best and wish they take KOS too greater heights.

Dr. Chaitra Jayadev

Secretary, Karnataka Ophthalmic Society

Dear Members of the Karnataka Ophthalmic Society, Delegates and Esteemed Guests,

On behalf of KOS, I extend warm greetings and gratitude to each one of you for being a part of our conference. This souvenir is a testament to the vibrant spirit of collaboration, innovation, and excellence that defines our Local Organizing Committee.

As we come together to share knowledge, ideas, and experiences, we reaffirm our commitment to enhancing eye care and improving patient outcomes. I express heartfelt appreciation to our distinguished international, national and state faculty for sharing their expertise, industry partners for their cooperation, the organizing team for their tireless efforts and our delegates for the active participation.

May this conference inspire new perspectives, forge meaningful connections, foster collaborations, and enhance eye care excellence.

Thank you for being part of this memorable event.

Sincerely,

Dr. Chaitra Jayadev

Secretary, Karnataka Ophthalmic Society

Greetings!!

This year's Scientific content at KOSCON 2024 promises like no other.

The Scientific content at KOSCON 2024 is shaping up to be exceptional this year. A considerable amount of planning has gone into this conference, driven by unique suggestions from the Scientific Committee. We are thrilled to welcome six distinguished international faculty members who will present their insights in person, along with numerous esteemed national faculty, enhancing the depth of scientific exchange across the country.

We experienced an overwhelming response for abstract submissions, which is evident in our robust program. This year, we are featuring 24 Instruction Courses, designed to offer valuable learning opportunities. A highlight of the event will be an entire day dedicated to Deferred Live Surgeries, where experienced surgeons will demonstrate the complexities involved in various procedures including Small Incision Cataract Surgery (SICS), Phakic Intraocular Lens (IOL) surgeries, and Femto-Laser-Assisted Cataract Surgery (FLACS) via live telecasts.

In our effort to support emerging talent, we have introduced a Postgraduate (PG) Competitive Free Paper session, providing a fair platform for PGs to showcase their research without direct competition from faculty. Additionally, we recognized the enthusiasm for undergraduate participation and thus launched an Undergraduate Competitive Session, which received an enthusiastic response.

Our Surgical Skill Training Course offers hands-on experience for aspiring surgeons, covering essential techniques in Cataract Surgery, Phakic IOLs, and Minimally Invasive Glaucoma Surgery (MIGS).

With 10 halls and a total of 150 sessions planned, this year's program is designed to cover a wide array of topics, ensuring that no stone is left unturned in enhancing the knowledge and skills of all delegates.

We look forward to seeing you at the conference and hope you make the most of the opportunities available.

Best Regards,
On behalf of all all Scientific Committee Members

Dr. Vikram Jain

Chairman, Scientific Committee
Karnataka Ophthalmic Society
Secretary, Udupi District Ophthalmic Society

Dr. Elankumaran Pasupathi

Treasurer Karnataka Ophthalmic Society

Dear Members of the Karnataka Ophthalmic Society, Delegates, and National Faculty,

It gives me immense pleasure to welcome all of you to the 43rd KOSCON at Udupi. On behalf of KOS, I would like to thank you all for being part of this knowledge-sharing exercise.

The Local Organizing Committee, headed by Dr. Krishna Prasad Kudlu, has laid out a feast that not only satiates gastronomic pleasures but also stimulates our knowledge-seeking brains. There is a carefully curated array of scientific sessions, workshops, and networking opportunities that promise to enrich our professional journey.

I express heartfelt appreciation to our distinguished international, national, and state faculty for sharing their expertise, industry partners for their cooperation, the organizing team for their tireless efforts, and our delegates for their active participation.

I hope you all have a productive and enjoyable time at this conference. Let us make the most of this opportunity to learn, share, and grow together.

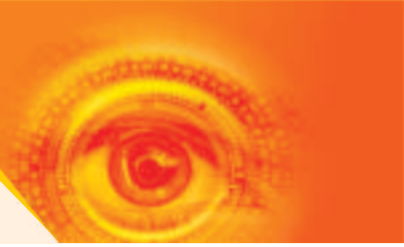

Thank you for being part of this memorable event.

Warm regards,

Dr. Elankumaran Pasupathi

Treasurer Karnataka Ophthalmic society

WELCOME ADDRESS FROM THE LOCAL ORGANIZING COMMITTEE

Namaskara!

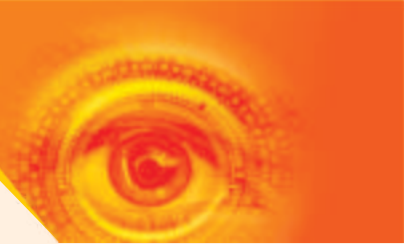

On behalf of the Udupi District Ophthalmic Society (UDOS), it is with immense joy and pride that we welcome you to the 43rd Annual Karnataka Ophthalmic State Conference (KOSCON24)! It is a true honour to stand before such a gathering of distinguished professionals, as we come together for an event that promises to be both enlightening and enriching—bringing together innovative minds, inspiring ideas, and diverse voices from across our region and beyond.

We are absolutely thrilled to host each one of you. Whether you're here for the first time or returning as a seasoned participant, your presence today signifies your unwavering commitment to the advancement of our field. It is your energy and passion that transforms this conference from a mere event into a cherished experience, filled with lasting memories to take home.

As we embark on this exciting journey over the next three days, it is our pleasure to introduce the overarching themes of this year's conference: **Science and Heritage**. Our aim is to ensure that each delegate not only gains valuable insights into the advancements in ophthalmic science but also experiences the rich cultural heritage of Coastal Karnataka.

Now in its third season here in Udupi, this conference stands as a testament to our collective efforts surpassing the success of our last event eight years ago. We are proud to host an exceptional line up of international, national, and state faculty members, each contributing their unique expertise and insights.

At this moment, we would like to express our heartfelt gratitude to especially our KOS President and patron Dr. Krishna Prasad Kudlu, who has been our driving force and guiding light behind the conference setup.

We thank Dr. Srinath Kamath ,President UDOS, Dr. Vikram Jain ,chairman scientific committee ,our patrons, Local Organizing chairmen along with KOS office bearers, our invaluable trade sponsors, UVA meridian, event organizers, audio visual staff, support staff, volunteers, and the entire organizing committee team for their tireless dedication and hard work which has been pivotal in bringing this conference to fruition.

As you embark on this journey over the next few days, we encourage you to seize every opportunity—not just to attend the sessions but to connect with your peers, exchange thoughts, and immerse yourself in the entertaining extravaganza we have planned for our two evening banquets, which promises to extend well beyond the formalities of this conference.

Once again, welcome to KOSCON24. We have made every effort to ensure a smooth experience, but as with any event, some hiccups may occur. We kindly ask for your understanding and patience. Let us embrace this time together and create wonderful memories to carry forward.

Thank you, and here's to a productive and inspiring conference ahead!

Ic5 - Crossing over the crossed eye- Esotropia Demystified

Date: 22-11-2024

Time: 13:30-14:30

Hall 3 - Dr. P N Srinivasa Rao

Dr. Deepti Joshi

Panel Discussion : (10 mins)

Though rare, yet having diverse etiology makes esotropia one of the most difficult strabismus to manage. The entity of infantile esotropia has evolved with respect to both decision making and management. Accommodative esotropia needs thorough refraction and accurate glasses to be prescribed to prevent development of amblyopia. Restrictive strabismus like Duane's and strabismus fixus has its own unique surgical modality of management. Post covid, there has been a rapid rise in cases of Acute acquired esotropia which are being tackled with botulinum toxin. Through this instruction course, we bring all variants of esotropias under one roof so as to simplify the approach and highlight the protocol of management of each type of esotropia individually

IC20 - Quandaries and Queries in Neuroophthalmology

Date : 22-11-2024

Time : 13:30-14:30

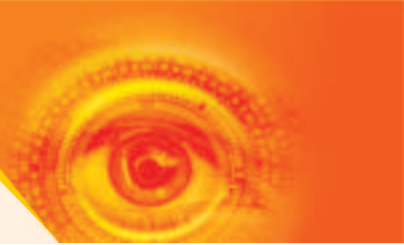

Hall 4B - Dr. C R Kamath

Dr. Sudha Girish Menon

Panel Discussion : (10 mins)

This instruction course discusses some common dilemmas faced in management of neuro ophthalmic cases. The modules include a. Discussion on management of patients presenting with chronic headache. b. Algorithm for management of third nerve palsy cases. The investigative modalities in neuro ophthalmic cases will also be discussed. c. The choice and interpretation of visual fields in neuro ophthalmic cases d. The use of OCT in diagnosis and management of neuro ophthalmic cases e. A neurologist will take us through the neuro imaging choices and interpretation of scans. This course will benefit post graduate students and all general ophthalmologists in managing these common cases. Decision making on whether to investigate further and of so what investigations to do and how to interpret these will benefit the listeners.

- 1 Chronic Headache: management algorithm (8 mins) Dr. Soumya S
- 2 Management of medical and surgical third nerve palsies (8 mins) Dr. Chidanand Kulkarni
- 3 Visual fields: A useful tool in neuro ophthalmic diagnosis (8 mins) Dr. Anusha Arvind

A Kaleidoscopic view on IOL Biometry

Date : 22-11-2024

Time : 12:00-13:30

Hall 4C - Dr. P Govinda Raj

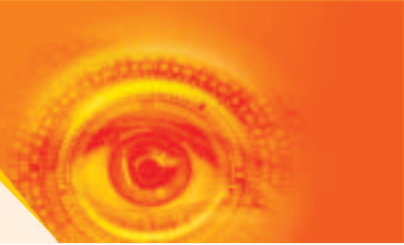

This instruction course encompasses a detailed overview on IOL Biometry and its advances in the recent years from the point of view of cataract-refractive surgeons dealing with routine, premium and phakic intraocular lenses on a regular basis. IOL Biometry is the fundamental science behind our regular day to day surgeries for an optimum visual recovery by the cataractous patients and is continuously changing every year to assimilate and enhance the regained vision to achieve the best vision possible. The instructors will cover recent advances, latest machines, calculators, complex situations and phakic intraocular lenses in details.

DAY 1 - FRIDAY

- | | | |
|---|---|----------------------------|
| 1 | The latest machines in IOL Biometry | Dr. Sneha Gupta Sengupta |

Hall 4C - Dr. P Govinda Raj

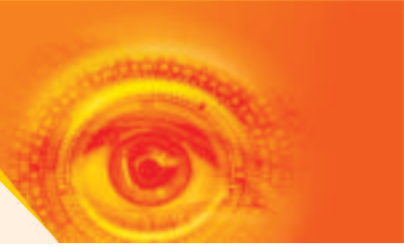

Dr. Mallikarjun M Heralgi

Itching and watering of eyes is a common complaint that brings many patients to Ophthalmology OPD. It can affect the routine activities of the patients hampering the quality of life. Though it seems as a minor problem and tempts us to ignore it often, it may continue to a potentially vision threatening disease. It is very essential to methodically examine the patients to diagnose the underlying cause and plan the treatment accordingly. Many a times these symptoms are the iceberg of an immunologically mediated disease in which case multidisciplinary approach is indicated. This Instruction course outlines the etiology , pathophysiology and the management of these symptoms in different group of patients to tailor the treatment approaches

Hall 4D - Dr. K Nagaraj

Dr. Kavitha V

Assessing vision and carrying out refraction in children is quite difficult and challenging. The incidence of refractive error in children is on the rise either because of improvement in diagnosing methods and clinical acumen or changes in lifestyle or a combination of both. It is equally important to interpret these findings so as to enable one to diagnose presence of refractive error and amblyopia at the earliest (during preschool itself) and prescribe appropriate spectacles with suitable power, frames and lenses and treat amblyopia. Yet another important aspect is the early detection and treatment of keratoconus in children with high cylindrical powers. More and more parents are apprehensive about defective visual problems in children and it is mandatory to address each one of them ; same will be discussed by eminent paediatric ophthalmologists in the state.

IC26 - Diagnostics and imaging simplified

Date : 22-11-2024

Time: 13:30-14:30

Hall 4D - Dr. K Nagaraj

Dr. Gairik Kundu

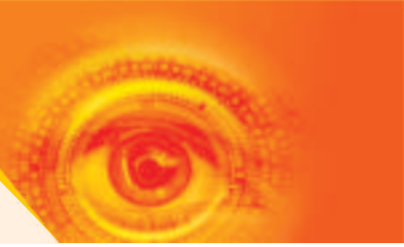

Diagnostics form an important aspect of investigation and management of patients in our clinics. Diagnostics keeps evolving and the future is in looking at how we integrate various imaging modalities and customise them to maximise patient outcomes and increase our practice. Diagnostics is invariably not only looking at imaging tools uni-dimensionally, but true benefit is combining all the latest tools. We aim to cover and simplify a wide array of diagnostics commonly used from anterior segment imaging including corneal diagnostics- corneal tomography, AS-OCT, specular microscopy, and confocal microscopy, to the latest biometers and hybrid tools in cataract practice. We also aim to simplify glaucoma diagnostics from visual fields to OCT RNFL analysis, along with retina diagnostics including FFA to the latest OCT devices and interpretation. Case based discussions from basics to latest advancements in these diagnostics would be covered.

DAY 1 - FRIDAY

IC9 - Ocular oncology toolbox : A comprehensive

Date: 23-11-2024

Time: 11:30-12:30

Hall 4B - Dr. C R Kamath

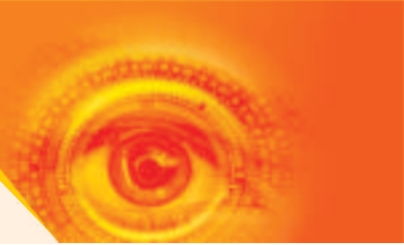

Dr. Shaifali Chahar

Accurate diagnosis and appropriate protocol-based management of ocular tumors is essential to save life, eye and vision. Most tumors present with their own unique signature. Paying attention to these details unique to each lesion can help make an accurate and timely diagnosis. The spectrum of lesions can be daunting. This course aims to provide a step-by-step approach to cover the spectrum of ocular tumors from pole to pole comprehensively and discuss the protocols in management. We aim to provide a tool box to identify the diverse spectrum of lesions, differentiate them from the masquerades, choose the appropriate diagnostic tests to confirm the lesions and highlight succinctly the protocol based management for these tumors.

Date: 23-11-2024

Time: 14:00-15:00

Hall 4B - Dr. C R Kamath

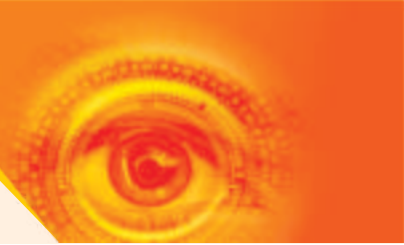

Dr. Shoruba Dinakaran

Glaucoma is an optic neuropathy where there is a gradual progressive loss of retinal ganglion cells. The aim of management in glaucoma is to reduce the intraocular pressure and thereby slow down the progression of optic nerve head damage. There are various surgical methods which are used to control the intraocular pressure in glaucoma & currently there are several minimally invasive glaucoma surgeries but the humble trabeculectomy still holds its own. So, let us what has made the trabeculectomy stand the test of time. Before we consider surgery for glaucoma it is important to decide when to operate. This IC will attempt to chalk out the when and why to operate, how to perform a trabeculectomy, the various complications & difficult situations that can be encountered while doing a trabeculectomy.

IC21 - Macular edema- not everything is DME!

Date : 23-11-2024

Time: 16:30-17:30

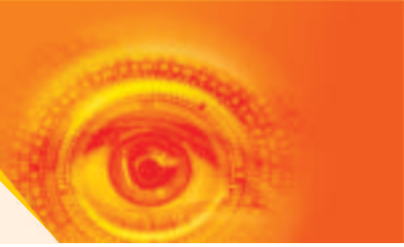

Hall 4C - Dr. P Govinda Raj

Dr. Apoorva A G

This comprehensive instruction course aims to deal with the varied etiologies of macular edema, NOT including diabetic macular edema (DME). The causes, methods of diagnosis and management of cases of "non- diabetic macular edema" (NDME) will be discussed in detail. The IC will be predominantly case-based and will explore the etiologies of NDME, their differentiating features and unique management. Pathophysiology of various causes such as vein occlusions, pseudophakic cystoid macular edema (PCME), uveitic macular edema, dystrophies causing macular edema as well degenerative cystoid edema will be discussed. We also aim discuss latest advancements in imaging techniques, pharmacotherapies and surgical interventions for NDME. The speakers are all astute vitreoretina specialists with several years of experience.

IC40 - Posterior Capsule Tear -All is not lost

Date : 24-11-2024

Time: 11:00-12:00

Hall 4B - Dr. C R Kamath

Dr. Deepak Megur

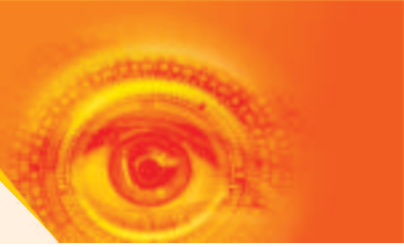

Posterior Capsule tear is an inevitable complication which every Cataract Surgeon is bound to experience. By following the right principles this complication can be managed effectively enough to provide an outcome that is almost indistinguishable from a routine case. This Video course aims at teaching the best practices in the management of PC tear. Using high quality video clips we aim to teach, tips for early diagnosis of a PC tear, prevent a nucleus drop, timely conversion to SICS, and anterior vitrectomy techniques. Surgical pearls to prevent anterior hyaloid rupture in the presence of a PC tear and also techniques to prevent the enlargement of the PC tear during anterior vitrectomy will be shared. Techniques for implanting IOLs in the presence of a PC tear will be demonstrated. By the end of the course the attendee would be aware of the various techniques of managing a PC tear which would yield very good outcomes.

Little eyes Big onus- The What's and How's on dealingwith Pediatric eyes in everyday OPD.

Date : 24-11-2024

Time: 11:00-12:00

Hall 4E - Dr. M P Shenoy

We ophthalmologists know that dealing with kids eyes is very much different from adult eyes. They aren't just little. Their basic physiology is different. Hence the line of management varies quite a lot when compared to adults. It is these tiny nuances in OPD practice which we can adopt in day to day practise. Be it pediatric cataract or squint or ptosis, the course of action taken in a kid is different. We hope to address that difference with this instruction course.
